

# CS300 Project 1 Store Proposal - Mark Sidarous

## Theme

<https://template.kendytheme.net/charlotty/>

I will be using the “Charlotty” theme from found at <https://themeforest.net/>. It's a single page portfolio page. A full page screenshot can be found to the right.

## What kind of javascript do you want?

I'm not 100% sure what javascript I want, but I would like it so that when the internal anchor HTML bookmark link is clicked, it does kind of a smooth scroll. It would also be cool to have a custom loading animation. Also, maybe some kind of font selector?

## Sections

- Header
  - Top - navbar that takes you to internal anchors in page
- Article
  - Personal image
  - 1 sentence description of who i am
  - CV link
- Article
  - More involved description of what i do
